

RODERICK FRY

at moaroom

The clever and simple functioning of the Pi System allows you to rapidly assemble an extremely stable table and then, when you change home, to just as rapidly take it apart and reassemble it - just by inserting planks or panels and pivoting the metal legs into place.

Without using screws or bolts you can also make a personalized table with our legs and a top made from solid wood, upcycled old beams, polished concrete etc.

The legs are made from laser cut and hand-bent metal near Grenoble - our tops are made in a small atelier in Normandy out of solid French oak.

Pi TRESTLES

Design Roderick Fry

The trestles allow you to create a desk or table which is stable and easy to assemble without any screws. Legs are delivered flat-packed to minimize their carbon footprint.

→ Made for a table or desk of these dimensions : Length to define (between 150 & 260 cm) x W 75 cm x H 74 cm Length to define (between 160 & 320cm) x W 88 cm x H 74 cm Length to define (between 180 & 320cm) x W 88 cm x H 90 cm

→ Materials :

Legs : Powder-coated steel

 \rightarrow Pi 75 Trestles - colors : Black semi-gloss

PI TABLE 75 - PI DESK 75

Design Roderick Fry

Product sold exlusively on www.moaroom.com or at showroom moaroom Paris

The Pi table is stable and easy to assemble without any screws. It is delivered flat-packed to minimize its carbon footprint.

→ Dimensions : Table - L 150 cm x W 75 cm x H 74 cm (4/6 persons) Desk - L 150 cm x W 75 cm x H 74 cm with drawers

→ Materials :

Legs : Powder-coated steel Top: 40 mm thick varnished solid oak with grooves Also available with a birch plywood top in its desk version

→ Pi 75 Trestles - colors : Black semi-gloss Gun metal grey-brown * Customizable color on order

\rightarrow Details :

Table is assembled by inserting the top into the trestles - it slides in easily thanks to the specific angle of the legs. Once the legs are in place and pivoted to their final position they become incredibly stable without any use of screws, bolts or rivets.

The table-tops we supply have shallow grooves across them to allow the metal straps of the legs to sit flush with the wooden surface.

The desk version comes with two metal drawers in black or gun metal grey-brown.

AUTEL PARTICULIER

by Moaroom Studio

Vases and candelabras have been were rethought by our designers Roderick Fry, Laurence Varga and Baptiste Trouvé.

Our collection 'Autel Particulier'
- which translates from French
into English as a 'Private Altar'
- was conceived to offer an everevolving way to decorate and light
a dining table with flowers (dried
or fresh) and candles suspended
around decorative light-bulbs
and as a way to hang flowers on a
wall above ones desk or amongst
framed pictures.

AUTEL PARTICULIER - SWEDISH HOUSE

Design Roderick Fry

The collection 'Autel Particulier' allows flowers and candles to hang above, and therefore liberate space on, a dining table. The Swedish House has very 'graphic' floating lines which frame flowers and or candles. Whilst discrete from the side the fine lines present the form of a traditional Swedish house or church when viewed from the end.

→ Three versions :

Swedish House 'Mixed' in BlackMetal / 6 flowers + 2 candles Swedish House 'Flowers' in Brass / 6 flowers Swedish House 'Mixed' Brass / 6 flowers + 2 candles

Each Collection contains all of the items one needs to suspend a selection of 6 elements over a table where the ceiling height is between 2.2m and 3m.

- \rightarrow The offer contains :
- 6 x hanging modules for flowers, two heights
- 2 x tubular horizontal bars 80 cm
- 2 x metallic vertical strips 60 cm
- 2 x metallic vertical strips 10 cm - 2 x ceiling attachments
- 6 x test tubes
- 8 x standard ceiling screws
 2 x candle adaptors (in the MIXED options)

→ Materials :

Black electrolyzed metal or brass + glass test tubes

→ Extra Details :

These models can be adjusted to other ceiling heights by adding or removing the vertical strips, or replacing them with chains or ribbons cut to the ideal length.

The candle adapters allow you to integrate non-drip candles in the place of 2 test tubes. Other candle adapters can be bought to transform the whole module into a long suspended candelabra of 6 candles.

PUBLIC PRICES INCL. TAX

Swedish House Mixed Metal Black electrolyzed steel and glass test tubes 390,00 Swedish House Flower Brass Brass and glass test tubes 468,00 Swedish House Mixed Brass Brass and glass test tubes 530,00

AUTEL PARTICULIER - ALEATOIRE

Design Roderick Fry

The collection 'Autel Particulier' allows flowers and candles to float delicately above, and therefore liberate space on, your dining table and add character to bare classic lightbulbs. The ALEATOIRE version has very simple 'graphic' floating vertical lines which rise and fall in random ('aleatoire' in French) fashion.

→ Two models :

- Aleatoire Flowers Brass / 6 flowers
- Aleatoire Mixed Brass / 6 flowers + 2 candles

Each Collection contains all of the items one needs to suspend a selection of 6 elements over a table where the ceiling height is between 2.2m and 3m.

 \rightarrow The offer contains :

- 6 x hanging modules for flowers, three heights
- 2 x tubular horizontal bars 80 cm
- 2 x metallic vertical strips 60 cm
- 2 x metallic vertical strips 10 cm - 2 x ceiling attachments
- 6 x test tubes
- 8 x standard ceiling screws
- 2 x candle adaptors (in the MIXED options)

→ Materials : Brass + glass testubes

→ Extra Details :

These models can be adjusted to other ceiling heights by adding or removing the vertical strips, or replacing them with chains or ribbons cut to the ideal length.

The candle adapters allow you to integrate non-drip candles in the place of 2 test tubes. Other candle adapters can be bought to transform the whole module into a long suspended candelabra of 6 candles.included.

The candle adapter allows to have a candle in place of a soliflore to create a harmonious object with flowers and candles.
