

20 Years of Coral

Coral light is 20 years old.
To celebrate we have created a coral reef.
It includes our new outdoor version of Coral.
But the reef is white, because in those 20 years
20-30% of all coral has bleached and died,
Caused by global warming.

For the first time David and his team have not travelled to Milan
To avoid the carbon emissions of flying from New Zealand,
To help save the remaining coral.
Watch the video below.

New Additions

Toru

Toru is inspired by microscopic diatoms which live in water and produce 50% of the air we breathe. Based on our award-winning Navicula feature light, it is crafted from strong, multi-layered bamboo plywood creating a natural skeletal skin. The light is designed to have functional downward lighting as it can be installed either horizontally or vertically. Toru is ideal for over a dining table, a lounge, a foyer, in a reception or as a corner statement piece.

Seed System Kitset
Bamboo Plywood
Available in all 12 stock colours

Diameter	Height/Length
445mm (18")	1100mm (43")

Coral outdoor

Coral is a designer pendant inspired by nature and geometric polyhedra. Coral was David's first kitset light 20 years ago which has informed the basis of all of our lights since! This classic design has now been reimagined for outdoor use. Coral outdoor is a clean, contemporary designer piece which will be timeless for your exterior.

Seed System Kitset
High pressure laminate

Diameter
600mm (24")

Kōwhai outdoor*

Introducing Kōwhai, inspired by the vibrant and iconic yellow flowers of the Kōwhai tree, native to Aotearoa/New Zealand. Native birds such as the Tūi and Bellbird all benefit from Kōwhai trees and Māori hold it in high esteem, valuing the durability of its hardwood and its many medicinal properties. This stunning light fixture is perfect for both indoor and outdoor use and adds a touch of natural beauty to any space.

Powder coated aluminium
Available in three colours

Diameter	Height
350mm (14")	720mm (28")

*Conceptual prototype.
